

## Paper-based Test Administration Directions Supplement

### Calculators

For grades 6-10 it is permissible to substitute the following language regarding calculators for that provided in the Test Administration Directions

#### GRADES 6-8

On sections 1, 2, and 3 you may use a basic calculator and a scientific calculator. If you do not have a calculator at your work area and you would like one, please raise your hand and let the proctor know. You may use a calculator on any items in sections 1, 2, and 3 in the math assessment. You may also use your scratch paper and graph paper to calculate answers.

#### GRADES 9-10

On sections 1, 2, and 3 you may use a basic calculator and a graphing calculator. If you do not have a calculator at your work area and you would like one, please raise your hand and let the proctor know. You may use a calculator on any items in sections 1, 2, and 3 in the math assessment. You may also use your scratch paper and graph paper to calculate answers.

### Administering Math Section 4

If students are taking the entire math assessment in one assessment session, please instruct them to raise their hand when they reach the end of section 3 so that calculators can be collected. Students do not have to start section 4 together as long as calculator usage is monitored. It may be helpful to paper clip the last section as a reminder for students. Do not use staples or tape on the booklet.

### Sample questions

The sample questions at the beginning of each test booklet are the same at each grade level. The purpose of the sample questions is to provide students with examples of the format of the questions on the assessment. The directions for the sample test items is included in the Test Administration directions. The items are provided as part of this supplement for ease of use by the Test Administrator. The sample items are also available on the EED website.
